Do you want to...

- Design and build state-of-the-art computers?
- Be a part of a customer service help desk team?
- Provide hardware or software tech support?

See what Capital has to offer...

The Computer Support Specialist Program offers:

- Computer Support Specialist (CSS): Software Option
- Computer Support Specialist (CSS): Hardware Option

- Associate Degree or Certificate
- Traditional-Classroom format or Distance-Learning format

Computer Support Specialist (CSS): Software Option

This degree is designed to prepare you to become a Help Desk Technician, Software Support Specialist, or Customer Service Representative.

Topics include:
- Software-Related Customer Support and Technical Assistance
- Communication Skills
- Software Installation and Configuration
- Logical Problem Diagnosis and Solution

The CSS degree incorporates preparation for the certification examinations for either CompTIA (Computer Technical Industry Association) A+ or MOS (Microsoft Office Specialist).

Computer Support Specialist (CSS): Hardware Option

This CSS degree option is designed to prepare you to become a Hardware Support Specialist with a focus on hardware.

Topics include:
- Hardware-Related Customer Support and Technical Assistance
- Troubleshooting Computer-Related Problems
- Peripheral Device Installation and Repair
- Logical Problem Diagnosis and Solution
